	Date and Remarks	Order of the Tribunal
	Item Nos. 14 to 274 November 17, 2014	<p>In furtherance to the order of the Hon'ble Supreme Court of India dated 29th October, 2014 passed in W.P. (C) No. 3727 of 1985, we have taken up this matter for hearing. Registry is directed to make a separate file after numbering and registering the same in accordance with the National Green Tribunal (Practices and Procedure) Rules, 2011. Let the Original Application No. 196 of 2014: Krishan Kant Singh v. M/s. Hindustan Cocacola Beverages Pvt. Ltd., Mehdiganj, Rajatalab, Varanasi and other connected matters in the case of as listed today, be listed along with this case.</p> <p>Pollution of the River Ganga has been of a serious concern not only for the different wings of the State but even for the Judiciary. The Supreme Court vide its order dated 29th October, 2014 while referring the issue of industrial pollution of the River Ganga to this Tribunal, in no uncertain terms, expressed its anguish and serious concern in that behalf. It is not necessary for us to refer to that order of the Hon'ble Supreme Court in any greater detail. Suffices it to note that the Hon'ble Supreme Court observed that a total lack of monitoring by the statutory bodies and non-implementation of the Court's orders by the State Governments and the respective Pollution Control Boards, has contributed to the current state of affairs in respect of the River Ganga. It observed that</p>

there is no gainsaying that this River has significance not only in the spiritual and cultural/mythological sight of the countrymen, but has also sustained millions of lives on its banks/basin. While noticing that the National Green Tribunal has been established for effective and speedy disposal of cases relating to natural reserves, including environment, the Apex Court, not only expressed a definite confidence in this Tribunal, but also said that it was confident that the Tribunal, which has advantage and also availability to take assistance from agencies outside, will be able to effectively address all the questions relating to pollution of the Holy River by industrial effluents and thereby referred the matters relating to industrial pollution of River Ganga to this Tribunal. These include not only the grossly polluting industries referred to in the earlier part of the Hon'ble Supreme Court's order, but, also those that have been designated as highly polluting industries. Then, the Apex Court requested the Tribunal to expeditiously look into all these aspects and give a six monthly report to the Hon'ble Supreme Court.

River Ganga is mainly polluted by two sources: one is the industrial waste/effluents and the other is domestic sewage. The first aspect has been referred to this Tribunal; while the latter has been retained by the Hon'ble Supreme Court vide its order dated 29th October, 2014. As far as industrial pollution is concerned, there are only nine States which are primarily concerned with causing industrial pollution in the River Ganga. They are the States of Uttar Pradesh, Uttarakhand, Haryana, NCT of Delhi, Madhya Pradesh, Chhattisgarh, Bihar, Jharkhand, and West Bengal. The States of Jharkhand, Madhya Pradesh and Bihar are unrepresented today despite notice. Issue notice to the Secretaries of these States, returnable on

15th December, 2014.

Having heard the Learned Counsel appearing for the parties and the States and in view of the deliberations that took place with the concerned Secretaries of the Government of India, the Chief Secretaries, senior Officers of the respective States and the Chairman, CPCB and State Pollution Control Board, in the Chamber of this Tribunal, we are of the considered view that effective directions need to be passed in this case to prevent and control pollution of River Ganga, resulting from indiscriminate discharge of industrial effluents into the River.

Thus, we pass the following directions: -

1. In order to comply with the directions that we propose to pass hereinafter, it is necessary to constitute appropriate Committees at different levels to ensure proper implementation of the orders of the Tribunal, as well as, for getting proper feedback with regard to the steps taken and work executed at site. Therefore, we constitute the following Committees:-

(i) The Principal Committee

- (a) Secretary, the MoEF.
- (b) Secretary or Addl. Secretary of Ministry of Water Resources.
- (c) Chief Secretaries of the State of Uttar Pradesh, Uttarakhand, Haryana, NCT of Delhi, Madhya Pradesh, Chhattisgarh, Bihar, Jharkhand, and West Bengal.
- (d) Chairperson of the CPCB.
- (e) Joint Secretary of MoEF and Member Secretaries of the respective concerned State Pollution Control Boards.
- (f) Financial Advisor of the MoEF.

(g) A senior representative of the Finance Department of the Ministry of Water Resources dealing with the National Ganga River Basin Authority.

(ii) Implementation Committee

- (a) Chief Secretary of the State of UP.
- (b) Chief Secretary of the State of West Bengal.
- (c) Principal Secretaries of Department of Environment of all the concerned States.
- (d) Member Secretary of the CPCB.
- (e) Member Secretaries of the concerned State Pollution Control Boards.

The Chief Secretary of the State of Uttar Pradesh would be entitled to co-opt for any Member or Bodies as the case may be, that he deems fit and proper for being the Member(s) of this Committee.

(iii) State Level Committee

- (a) Secretary, State Dept. of Environment & Forest or Secretary having portfolio of Environment for the State.
- (b) Member Secretary of concerned State Pollution Control Boards and DPCC.
- (c) Representative of Local Bodies under the Ministry of Urban Development.
- (d) Representatives of Industries Departments.
- (e) Representatives of Water Supply and Sewage Board.
- (f) Scientists from the MoEF.
- (g) Eminent Professors from reputed educational institutions in the field of

Environment Engineering.

(h) Director of NEERI.

All these Committees shall perform different functions.

2. The Implementation Committee and the State Level Committee shall be responsible for implementation of the orders of this Tribunal. They shall report jointly or severally to the Principal Committee in regard to the various facets of compliance to the orders of this Tribunal and its progress from time to time. These Committees would operate at the District Level as well as at the State Level. Inspection by these Committees would specifically indicate the impact on and improvement, if any, in the water quality of the River Ganga and its tributaries.

3. All District Level and State Level Authorities in all the above mentioned States shall render full assistance and cooperation to the Committees afore-constituted. It shall be their responsibility to ensure that these Committees can function smoothly and free of any obstruction or interference from any quarters.

4. These Committees, at the first instance, shall, within one week, provide a comprehensive list of all the seriously water polluting industries in all these States, particularly, the State of Uttar Pradesh, which are directly or indirectly discharging their trade/industrial effluents into the River Ganga or its tributaries and are operating without consent of the Boards, without ETP or without any anti-pollution devices and are discharging untreated effluents.

5. The Principal Committee shall be entitled to suggest policy decisions and action plans that are required to be taken in the interest of environment. It shall have overall control over the State Level and the Implementation Committees. It shall be responsible for submitting monthly reports to the Tribunal with complete data that is prepared and collected, during the intervening periods, during which orders are passed by the Tribunal from time to time.

6. The Committees would ensure that proper criteria for identifying seriously water polluting industries is put on the website of the MoEF, of the respective States, CPCB and the concerned State Pollution Control Boards. Determination of this aspect need not be quantity-based but be quality-based.

This is for the reason that a smaller unit of the above industries/units, operating without consent and without having any ETP, may cause even much greater pollution than a bigger industry, which is operating with ETP and consent or a unit which is a 'no discharge unit' or a 'zero discharge unit'.

7. We also direct the Regulatory Authorities to issue guidelines in relation to the 'zero discharge units'. A 'zero discharge unit' must essentially be a unit which does not discharge any amount of liquid effluents, not even treated effluents. It may be as a result of complete recycling of its effluents or evaporation or because of adoption of any other mechanical process, like incinerator etc. In other words, if by adoption of any scientific process known to environmental jurisprudence, the unit

does not discharge any effluent, then it should be called a 'zero discharge unit' and not otherwise.

Industrial pollution of the River Ganga arises mainly from seven types of industries in these different States, viz. Paper and Pulp industry, Sugar, Distillery, Tanneries, Dyeing, Printing and Slaughter Houses.

8. We are not oblivious of the limitations on the working of these Committees, but certainly a situation has come when it is inevitable to ensure compliance of these directions on priority basis and with utmost seriousness.

Thus, we direct that the State Level Committees shall submit or cause to be submitted, a drainage map of all the water polluting industries and industrial clusters, within the jurisdiction of the respective States to the Tribunal before the next date of hearing.

9. The State Level Committees shall also submit a separate plan specifying the points where the drains or direct discharge into River Ganga or its Tributaries, is identified. It could be framed on the lines of the report as was prepared by the CPCB in regard to the River Kali.

10. It is evident that there may be highly polluting units which are unable to put up any ETP or anti-pollution devices because of their economic or allied limitations. However, they had been operating for years and closing them at the first instance may amount to infringement of their rights. Thus, it is necessary to direct the State Level Committees and wherever necessary, the Implementing Committee to identify the points where the CETPs / ETPs can be installed on the drains and *nalas*, where they join River Ganga or any of its Tributaries.

11. Estimated costs for installation of such plants are also to be stated in these reports.

12. All industries in these States, carrying on the activities of Tannery, Paper and Pulp, Sugar stand alone, Sugar-cum-Distillery, Dyeing, Printing and Slaughter Houses, which are;

(a) Discharging their untreated industrial/trade effluents directed or indirectly into the River Ganga and/or any of its tributaries;

(b) Operating without consent of the concerned Boards; and

(c) Have not installed any ETP or any requisite pollution control devices;

shall be directed to stop their business/industrial activity forthwith and not permitted to operate, in any manner whatsoever, except with the specific order of this Tribunal which shall be complied with without delay and default. If necessary, the Committees, Boards and all other concerned Authorities shall seal the premises of such units. The Police Authorities are hereby directed to provide the required help to the concerned Committees for implementation of this Order.

The units so closed, shall be at liberty to move the Central/State Pollution Control Boards, for obtaining consent within two weeks from today. If such application is filed, the same shall be dealt with expeditiously and the consent order should be declined and/or issued with such conditions as the concerned Board may deem fit and proper in the facts of the case. The concerned industry shall install ETP or such anti-pollution devices as may be

directed by these Boards, in order to ensure that the effluents discharged by it, is within the prescribed limits. After grant of such consent by the Board, the concerned unit can restart its operation in accordance with law.

The Committees shall exercise due care and caution in implementation of this order. We make it clear that this order will not apply to those industries in the aforementioned States, which are carrying on their industrial activities having installed ETPs and have obtained consent of the respective Boards, but their parameters are found not to be strictly in compliance with the prescribed standards. Such units shall be given one month time by the respective Boards, Committees, Governments and Authorities to bring the effluents discharged by them within the prescribed standards. Such units would be required to ensure within that period that their ETPs and anti-pollution devices are performing efficiently and regularly. They shall submit the analysis reports to the respective Boards/Authorities and also request them for conducting inspection of their units.

We are seriously concerned with the pollution of the River Ganga, caused by the Tannery industries at Kanpur, Paper and Pulp industries, Sugar industries and Distilleries on the belt of River Kali and Yamuna which ultimately join the River Ganga at Allahabad.

The Committees shall also consider passing of directions requiring industries to install online automatic monitoring systems, not only in relation to their trade effluents and working of CETP, but even in regard to the parameters for which effluents are treated, with consideration to the operations of the industries as a unit, including its total

water requirement. The Committees will also provide complete details in regard to the points, where CETP and/or ETP are required to be installed. It will also provide the capacity of such units to ensure that the industrial effluents are properly treated. The Committees which met on 11th November, 2014 shall hold a meeting on 12th December, 2014 to consider the modalities. The case will be listed before the Tribunal for submission of the Reports and issuance of further directions on 15th December, 2014. The Officers are informed accordingly.

The respective States are also directed to publish this Order in news media through advertisements.

The times have come when an enforceable action plan for controlling and preventing the pollution, as well as restoring purity and wholesomeness of the River Ganga should be framed and all the Authorities, without fail, should be directed to implement them vigorously.
